

```
const Post = ({ title, content }) => (  
  <div>  
    <h1>{title}</h1>  
    <div>{content}</div>  
  </div>  
)
```

```
class PostContainer extends React.Component {  
  state = { post: null };  
  
  componentDidMount() {  
    fetch(`/posts/${this.props.id}`)  
      .then(post => this.setState({ post }));  
  }  
  
  render() {  
    const { post } = this.state;  
  
    return this.props.render({ ...post });  
  }  
}
```
