

```
import React from 'react'
import PropTypes from 'prop-types'
import { withRouter } from 'react-router'

// A simple component that shows the pathname of the current location
const ShowTheLocation => ({ match, location, history }) => (
  <div>You are now at {location.pathname}</div>
)

// Create a new component that is "connected" to the router.
const ShowTheLocationWithRouter = withRouter(ShowTheLocation)
```
